

Terminalia

Terminalia is a genus of large trees of the flowering plant family Combretaceae, comprising nearly 300 species distributed in tropical regions of the world.[2] The genus name derives from the Latin word terminus, referring to the fact that the leaves appear at the very tips of the shoots.[3]

There are 282 accepted Terminalia species as of April 2021 according to Plants of the World Online.[2] Selected species include:
