

## Wikstroemia

See text

Wikstroemia is a genus of 55-70 species of flowering shrubs and small trees in the mezereon family, Thymelaeaceae. Hawaiian species are known by the common name '■kia.[1]

Wikstroemia indica (Chinese: ■■■; pinyin: li■o g■ wáng) is one of the 50 fundamental herbs used in traditional Chinese medicine.

The bark fibres of several species of Wikstroemia are used to make paper.
